

Product Portfolio

We love simple. We live simple.

The best ideas are almost always the simplest. Or is it, the simplest ideas are almost always the best? Whichever way round it goes, we agree wholeheartedly. With both.

Innovation at its best isn't about technology or chemistry or huge leaps forward in discovery. It's about what it does and the difference it makes; what it delivers to people who don't care how, only that it does. We love these easy-going game-changers. We celebrate uncommon sense.

'Live Simple' is at the heart of everything we do. It has inspired us to design and develop a series of unique products that easily integrate into your home to help you sleep better, manage light and effortlessly add your own personal touch of colour and texture.

Crucially, all our roller blinds and smart motorised options are easy to assemble and fit. And what could be simpler than our unique Fabric Changer – a straightforward way to refresh your colour scheme without having to buy and fit an entirely new blind mechanism. Cost saving for you and better for the environment, that's living simple.

Clearline Bloc Blinds offer a stylish fabric collection ranging from sophisticated plains to vibrant statement patterns and everything in between. Choose the best fabric for your customer according to their needs.

Blackout Fabric

Ideal for bedrooms, cinema rooms and rooms where strong sunlight or light pollution is an issue.

Translucent Fabric

Allows light to filter through whilst providing privacy. Perfect for living areas and working spaces.

Textured Fabric

Add a bit more interest to your window blind. Perfect for living areas and working spaces.

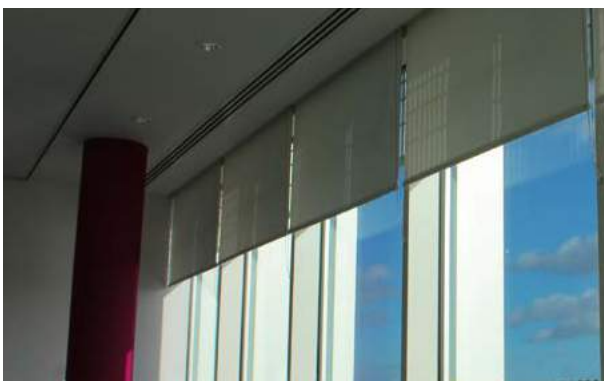

Moisture Resistant PVC Fabric

Best placed in bathrooms, wet rooms, and near sinks.

Screen Fabric

Screen fabric will protect against the sun and harmful effects of UV rays. Ideal for offices.

Fabric Codes

Our fabrics have been sorted into different bands according to price. For example:

1. Snowdrop (C)

917149-0088

(C) = Fabric Band

All fabrics with the **Same Coloured Backing** are marked with an *. For example:

Wood Pigeon* (B)

0017-017

Fabric Cards

Order our Fabric cards or download the digital versions on our website!

www.clearlinewindows.co.uk

Sustainable.

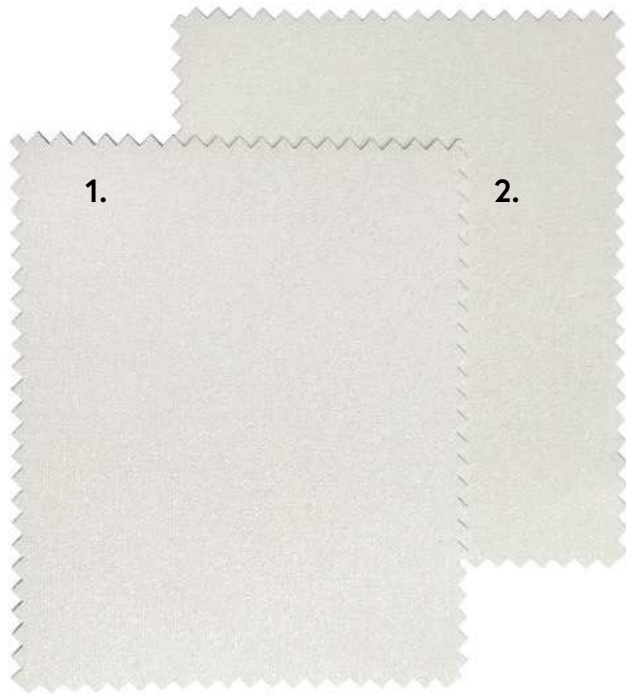

Our sustainable range of fabrics come from a facility which has a Five Zero Green production process.

1. **Energy** – Production process is CO₂ Neutral.
2. **Water** – Leaves factory as drinkable.
3. **Air** – Bio Fuels used in a circulated closed heating system creating hot water for production processes.
4. **Ingredients** – Materials used with the least possible impact on our health and the environment.
5. **Waste** – Minimised using regulated manufacturing processes.

BlocOut Blackout Blind
Flax Blackout Fabric

BlocOut

Sleep nourishes life. And just like the food we eat, the better the quality, the better we feel. Restless and unsettled nights starve our well being, resulting in unproductive, anxious days. The better we sleep, the better we live.

The award winning BlocOut blackout blind offers unrivalled levels of darkness in your room as well as reducing draughts and heat loss through your window by up to 43%.

The light blocking siderails and bottom seal make it an ideal sleep aid for young children, light sensitive sleepers, shift workers and daytime nappers. It is perfect for use in nurseries, bedrooms, TV gaming rooms, home cinemas and even photography dark rooms.

Choose blackout fabrics for best results with BlocOut.

Features

- ✓ Effective blackout for better sleep
- ✓ Easy to Measure, Easy to Fit
- ✓ Custom made siderails and bottom seal
- ✓ Child safe & chain free
- ✓ Spring operated mechanism
- ✓ Reduce heat loss and heat gain
- ✓ High quality blackout fabrics
- ✓ 3-year guarantee
- ✓ Manufactured in the UK

Skylight Blinds

Easy to install and just as easy to use, Bloc Skylight blinds have been created to fit and complement the world's most popular skylight brands. We make blinds to fit VELUX, Roto, Fakro, Rooflite, Dakstra and many more manufacturers. It makes choosing the right style to fit your specific skylight so simple. No modifications or compromises required. The blind you order is made specifically to fit your window, here in the UK. With over 100 colours and fabric choices, matching the blind to your taste is simple too.

Easy to install

Four screws. 60 seconds. That's how easy it is to install Bloc Skylight blinds. Our simple online 'how-to' videos are easy-to-follow, step-by-step installation guides.

Easy to use

Skylights are often difficult to reach, but that shouldn't make them difficult to use. Powered by either sunlight or battery, our simple remote-control options make adjustment simple. And for skylights that aren't so out of the way, you simply tilt the handle of the blind to release and pull back to lock it in place.

Features

- ✓ Easy four-screw installation process
- ✓ Choose from a wide range of colours and fabrics
- ✓ Wide range of sizes available
- ✓ Manufactured in the UK
- ✓ Cordless, so child safe
- ✓ Can be solar powered or manually adjusted

Blossom White Blackout Fabric

Bloc Roller Blind

A modern roller blind.

With blackout or a translucent fabric.

Controlled by hand, by app or on a timer.

We do all of that.

Matching your windows to your room's decor has never been simpler, especially if you like to change things on a regular basis. Our award-winning Fabric Changer system is a straightforward way to refresh your colour scheme without having to buy and fit an entirely new blind mechanism. It's also cheaper and better for the environment. So, when you fancy a seasonal or longer-term change, simply hook off the existing blind and hook on a new one. Simple.

Features

- ✓ Effective blackout for better sleep
- ✓ Easy to Measure, Easy to Fit
- ✓ Precision cut to fit your windows
- ✓ Built in Fabric Changer allows you to change and update your look in an instant
- ✓ Child Safe
- ✓ High quality fabrics
- ✓ 3-year guarantee

White Smooth or Wood effect Venetian - A safe and modern way to effortlessly control light in any room in your home. The Bloc Venetian Blind offers you the cleanest and most seamless look on the market, with 'anti-warping' technology as standard, making it suitable in every room in the home.

Life is simpler when its safer.

Our revolutionary Bloc Venetian Blind is a simpler, safer alternative to traditional chain and cord blind-height adjusters. Simpler, because of the lower/lift mechanism allowing you to raise the blind by hand; safer because it replaces the dangling loop choke hazard of a normal blind's mechanism.

Features

- ✓ 100% waterproof
- ✓ UV resistant
- ✓ Easy to clean
- ✓ Child Safe
- ✓ Smooth, accurate positioning

bloc Roller Blind Premium

Our Premium Roller Blind with its matching pelmet gives windows a more considered, interior-designed look. It's flexible too, allowing you to change the pelmet as well as the blind using our unique Fabric Changer system. When retracted, the blind sits neatly inside a made-to-measure cassette for a tidy look that also prevents discolouration from sunlight.

- ✓ Sleek chassis protects the fabric from fraying
- ✓ Precision-cut to fit your windows
- ✓ Fabric Changer system included

bloc Pelmet

Upgrade the look of your blind with our stylish pelmet. It can be clicked onto the cassette of your BlocOut, BlocOut XL, Premium Roller Blind and Zebra Roller Blinds. It can be added to other blinds using a simple metal bracket.

bloc Roller Blind Twin

Our Twin Roller Blinds are the perfect solution for those who want the option of a translucent fabric for privacy and a blackout fabric for darkness. No need to purchase two separate blinds.

- ✓ 2 fabrics
- ✓ Fabric Changer system included

Ouro Roller Blind

Our Ouro Roller Blind can be fitted within the recess of the window and on the front surface of the window. Available in a reverse or standard roll and the control mechanism (chrome chain) can be on the left- or right-hand side.

- ✓ Quality fabric
- ✓ Chrome chain
- ✓ Metal brackets
- ✓ Fast delivery

Motorised Systems

Remote Control Motorised System

Our Roller Blinds are compatible with a motorised system for added convenience and enhanced child safety. The battery is contained within the barrel of the blind and is charged at fixed position via a charger plug. The motorised system is easy to install and requires no hard wiring. The blind can be supplied with a multi-channel remote capable of operating up to 20 blinds in each of its 15 channels.

Motorised Blind system is compatible with Bloc Roller Blinds, Skylight Solar Motorised, and BlocOut XL.

Smart Motorised System

Bloc Blinds' iQ intelligent blind system seamlessly lets you add motorised window blinds to your collection of SMART home devices. Chain free and multi-purpose the discrete battery powered system is easy to install.

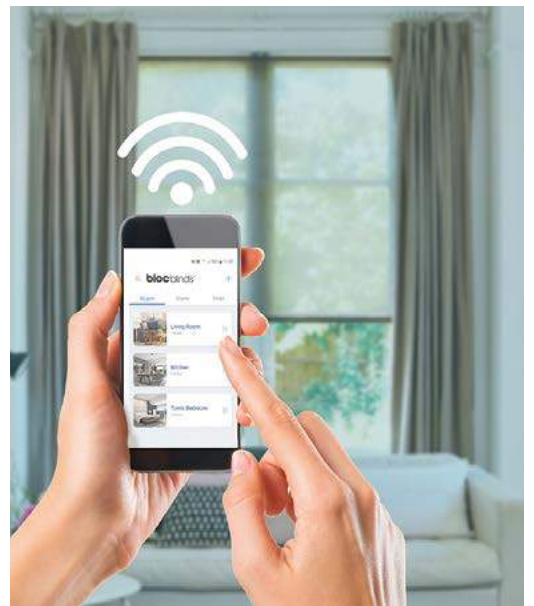

You choose how to control your blinds whether you are at home or away and set the scene according to your needs at the touch of a button. With personalised positioning you can control light and privacy day or night, enhance home security and adapt temperature efficiently. The SMART Motorised Blind system is compatible with Bloc Roller Blinds, Skylight Solar Motorised, and BlocOut XL.

App features:

- Timer
- Scene settings
- Control blinds in multiple properties from one app
- Room control individually or simultaneously
- App control
- Battery feedback - feature on smart phone / tablet indicates battery levels
- Favourite blind position

Create a smart home with Bloc Blinds iQ or simply integrate it with your existing smart home devices.

BlocOut

Award winning blind, the BlocOut is capable of blocking light and draughts thanks to the exceptional quality of its individual components. Each part, from the brush seals to the cassette holder and aluminium frames are designed to last. BlocOut blinds come in a wide range of colours and patterns to suit a variety of environments and tastes.

Curtains

BlocOut

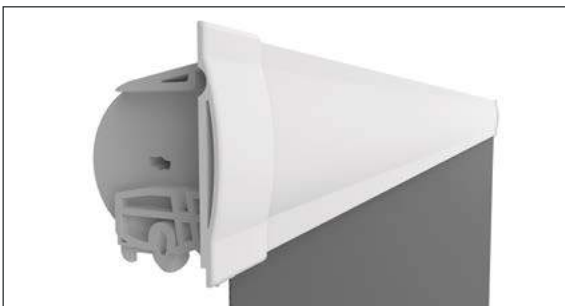

Curtains trap hot air and prevent it circulating the room. This can lead to heat loss. BlocOut creates an energy efficient barrier that minimizes heat loss through the window and leaves radiators free to heat a room faster.

Aluminium Colour Options

-  **Anodised Silver**
Natural Finish
-  **White**
Matt Finish

Features

Bloc Blinds incorporate a number of specially developed features that enhance the premium quality of our blinds;

Cassette

The fabric which is around the spring and barrel mechanism is completely enclosed, the siderails slot into cassette ends on installation.

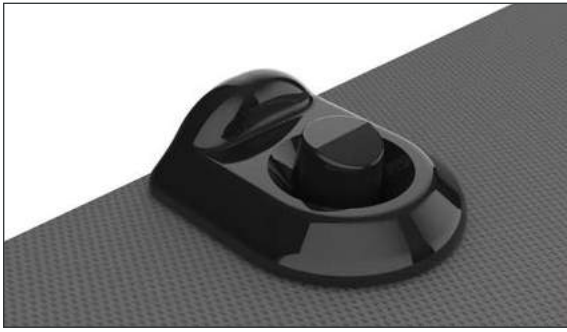

Child Safe

The blind is operated via a spring system. The blind pulls down through the siderails locking in place when the handle is released. The handle is then pushed in towards the window releasing the lock which enables the spring to retract the fabric. There are no cords.

Seal

Brush and rubber seals are attached to the bottom of the handle, when the blind is closed, they create a barrier between the blind and sill, blocking out light and reducing heat loss.

Pips

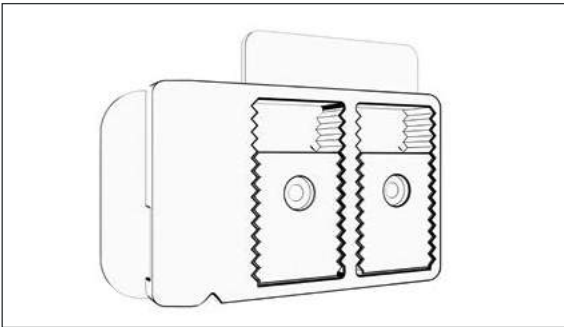

Pips are attached to the fabric to ensure the blinds stays securely within the runners at all times.

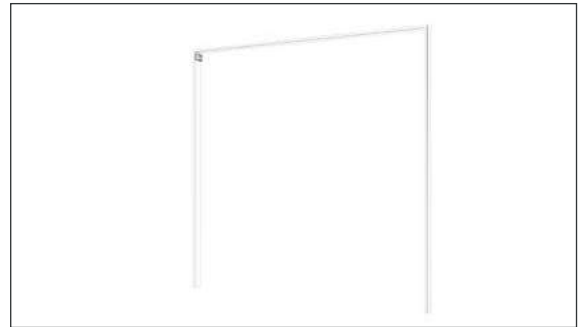

Brush Seals

These create a barrier between the blind and the window frame, blocking out light and reducing heat loss.

Product Dimensions

- A. Cassette height: 60mm
- B. Frame width: 32mm
- C. Cassette depth: 52mm

PRODUCT SIZE LIMITS

- Min width: 400mm
- Max width: 1800mm
- Min drop: 300mm
- Max drop: 1500mm

Product tolerance limits

To ensure correct operation and full bloc out performance the blind can only work within limited window reveal tolerances i.e. the window must be as square as possible, fitting a blind into or on the edge of a window recess outside of the stated tolerances will lead to poor operation, reduced bloc out performance and or product damage.

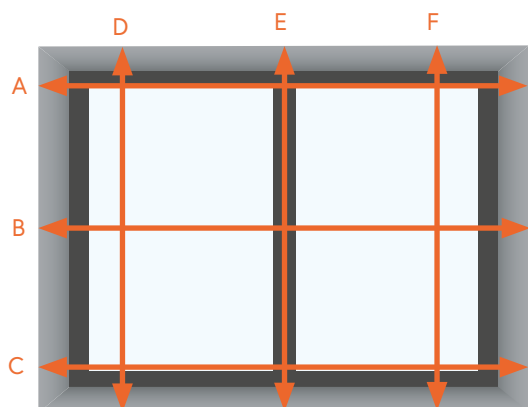

The cassette will always be made to the top width (A)

The siderails will always be made to the smallest height

The middle width (B) and the bottom width (C) can have no more than - 2mm variation from the top width

Bottom width (C) can have no more than +/- 6mm variation from the top width

The height measurements (D) (E) (F) must not have a variation of more than +/- 5mm.

Operation

The blind is operated via a spring tension system using the handle at the bottom of the blind. The blind simply pulls down through the siderails locking whenever the handle is released, the handle is then pushed in towards the window releasing the lock which enables the cassette to retract the fabric. To ensure correct operation the user must operate the blind with 2 hands held centrally on the handle not to one side of the blind. To ensure fabric does not come out of the siderails keep the window closed when the blind is in the closed position.

Care

To keep the blind looking it's best through time the customer must ensure the product has been installed and operated securely and correctly, the fabric can be cleaned with a synthetic or feather duster and can be wiped lightly with a damp cloth.

Maintenance

All our products are manufactured using aluminium and glass reinforced nylon components, they do not present any corrosion problems in normal working environments. If there is a failure of a blind, a component can be replaced without the need for a new complete blind.

Replaceable components:

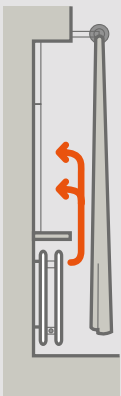

- Handle ends (brakes)
- Siderail feet
- Siderails

BlocOut XL

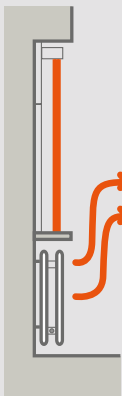

The BlocOut XL is capable of blocking light and draughts thanks to the exceptional quality of its individual components. Each part, from the brush seals to the cassette holder and aluminium frames are designed to last. BlocOut XL blinds come in a wide range of colours and patterns to suit a variety of environments and tastes.

Features

Bloc Blinds incorporate a number of specially developed features that enhance the premium quality of our blinds;

Fabric Changer System

With our Fabric Changer on recess fitted you can have a sophisticated blind system with the advantage of total design flexibility when it comes to your decor.

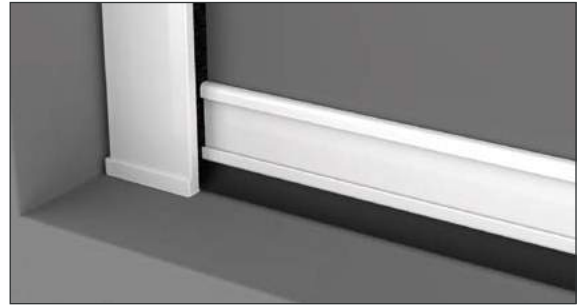

The fabric pelmet can also be hooked on and off to compliment your fabric choice.

Cassette

The fabric which is around the barrel mechanism is completely enclosed, the siderails slot into cassette ends on installation. The barrel is a 32mm aluminium tube which has a fabric changer strip attached allowing the fabric to be hooked on and off.

Operation

The blind is operated via a Chain or motorised system. The blind pulls down through the side siderails.

P-Clip

P-Clip attached to the chain ensuring conform to European regulations on child safety.

Seal

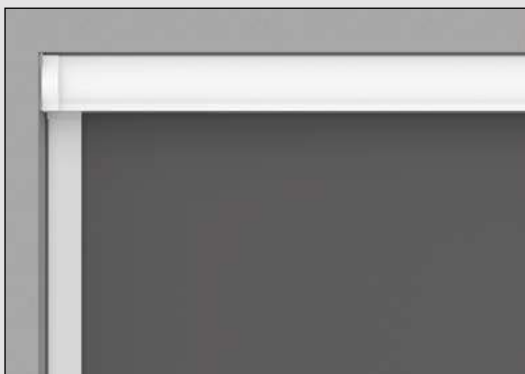

Rubber seals are attached to the bottom of the handle, when the blind is closed, they create a barrier between the blind and sill, blocking out light and reducing heat loss.

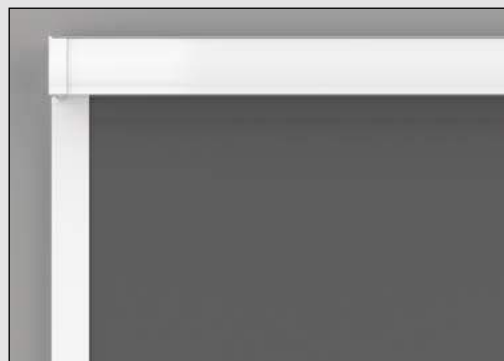

Multi Channel Remote for Motorised Blinds.

The blind can be supplied with a multi-channel remote capable of operating up to 20 blinds in each of its 15 channels.

Product tolerance limits

To ensure correct operation and full bloc out performance the blind can only work within limited window reveal tolerances i.e., the window must be as square as possible, fitting a blind into a window recess outside of the stated tolerances will lead to poor operation, reduced bloc out performance and or product damage.

Recess tolerance

The cassette will always be made to the top width (A)
The siderails will always be made to the smallest height

The bottom width (C) Can have no more than +/- 20mm variation from the top width

The height measurements (D) (E) (F) must not have a variation of more than +/- 6mm.

Surface tolerance

The cassette will always be made to the top width (A)
The siderails will always be made to the smallest height

The bottom width (C) Can have no more than +/- 5mm variation from the top width

The height measurements (D) (E) (F) must not have a variation of more than +/- 3mm.

Product capabilities

The BlocOut XL is available in both manual and motorised, the manual version can have the chain on either the left or right and the motorised version is the right-hand side only.

The BlocOut XL has a fabric changer system which allows you to change the fabric without dismantling the blind. The fabric is attached to a flexible PVC hook which is attached to the barrel.

Fabric pelmets are available for the BlocOut XL range. It is typically covered with the same fabric as the cassette fabric and can be simply hooked on or off.

Operation

The blind is operated via a chain, motorised or Smart motorised system. The blind simply pulls down through the siderails.

Care

To keep the blind looking it's best through time the customer must ensure the product has been installed and operated securely and correctly, the fabric can be cleaned with a synthetic or feather duster and can be wiped lightly with a damp cloth.

Maintenance

All our products are manufactured using aluminium and glass reinforced nylon components, they do not present any corrosion problems in normal working environments. If there is a failure of fabric or a component, depending on which, it can be replaced without the need for a new complete blind.

Bloc Skylight Blind

Bloc Skylight blinds can enhance the performance of all forms of roof windows. Compatible with all major skylight brands, we can also work with you to engineer custom built blinds for your windows.

Installation of the blind couldn't be simpler. Our four screw systems means installation is easy and mess free.

Aluminium Colour Options

Anodised Silver
Natural Finish

White
Matt Finish

Features

Bloc Blinds incorporate a number of specially developed features that enhance the premium quality of our blinds;

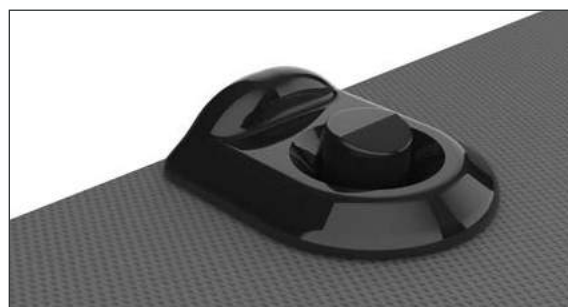

Brush Seals

These create a barrier between the blind and the window frame, blocking out light and reducing heat loss.

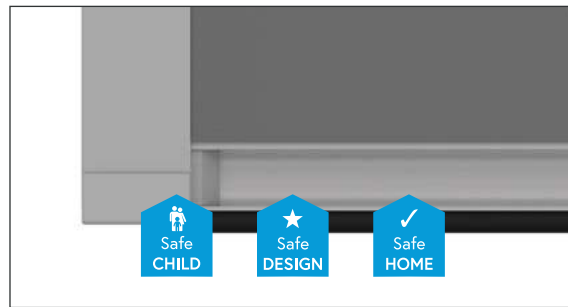

Fabric

The fabric is completely enclosed, reducing fading and significantly extending the life of the fabric.

Pips

Pips are attached to the fabric to ensure the blinds stays securely within the runners at all times.

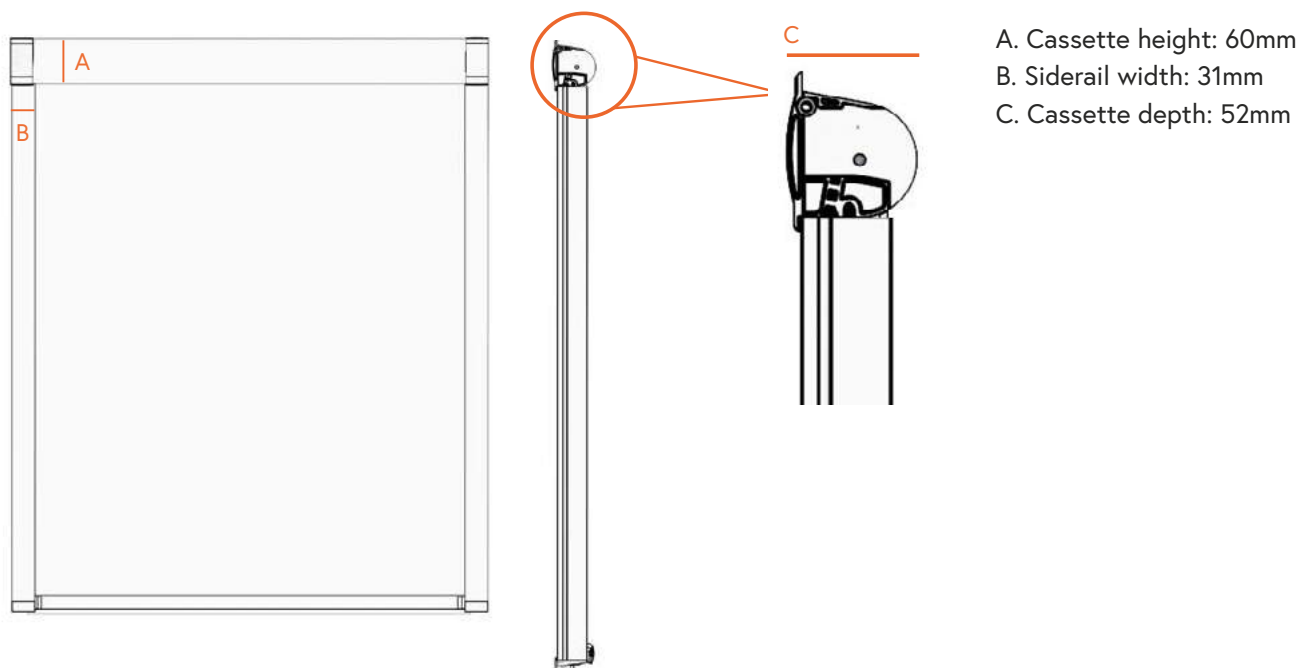

Child Safe

Our skylight blinds are safe by design - there are no cords. The blind is pre-tensioned via a spring, so while being Child Safe this feature also makes it easier to install.

Product Specification

Roller Tube	Aluminium
Cassette Colour	Anodised Silver/ White
Control	Spring
Fabric Position	Reverse Roll
Sizes	All manufacturing Codes
Suitable for	Velux® Roof Windows, Dakstra®, Fakro®, Okpol®, Roof Lite®, Roto®, non standard, others

Product Dimensions

Operation

Operation of the blind is through a spring tension system operated by tilting the handle at the bottom of the blind. The blind simply pulls down through the side channels locking whenever the handle is released. The handle is then pushed in towards the window releasing the lock which enables the spring to retract the fabric. It complies fully with all relevant child safety standards.

Care

We are all very proud of our stunning Skylight blinds. To keep them looking their best for years to come, always ensure that your Skylight blinds have been securely fitted and use a synthetic or feather duster to clean, refrain from using soap and water.

Maintenance

All our Skylight blind components are manufactured using aluminium and glass reinforced nylon. They do not present any corrosion problems in normal environments. The system has been designed for smooth operation, together with rigidity to prolong the window blinds working life.

Replaceable components:

- Handle ends (brakes)
- Siderail feet
- Siderails

Bloc Skylight Blind Solar Motorised

Compatible with all major brands. Harnessing the energy from the sun via a discreet solar panel. The solar panel is designed to charge the battery during daylight hours throughout the lifetime of the blinds. Even in the event of no sunshine, the battery will last for 300 operations.

Installation of the blind couldn't be simpler. Our 6 screw system means installation is easy and mess free.

Bloc Venetian Blind

The Bloc Venetian Blind offers you the cleanest and most seamless look on the market. Operation could not be simpler, to lower and raise the blind, use the bottom handle. The Bloc Venetian comes with 'anti-warping' technology as standard, making it suitable in every room in the home.

Effortless cordless lower/lift system

Simply raise and lower the blind using the bottom handle.

Features

Bloc Blinds incorporate a number of specially developed features that enhance the premium quality of our blinds;

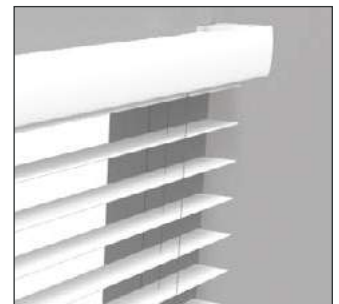

Smooth or Wood Effect Slats

Choose between either wood effect or smooth 50mm slats.

Wand

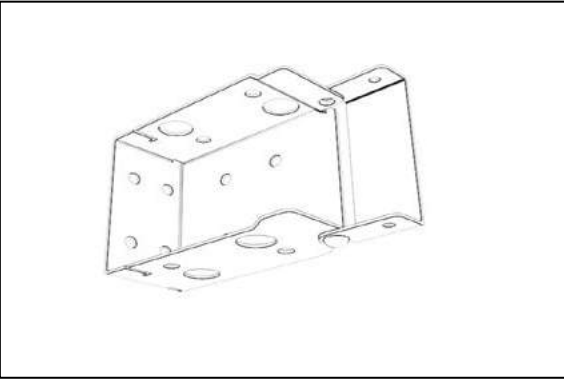

Cordless slat tilting using the colour matched wand.

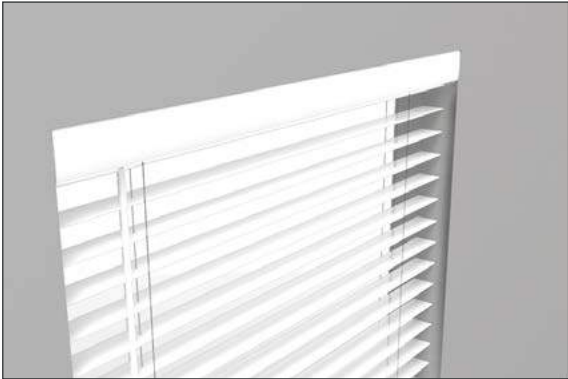

Pelmet

Neat and modern pelmet. Comes as standard for recess/surface fitting.

916-1220	4	N/A
1221-1830	6	N/A
Colour	Colour Matched	

Operation

The blind is simply raised and lowered using the bottom handle.

Care

To keep the blind looking its best through time the customer must ensure the product has been installed and operated securely and correctly. The blind can be cleaned with a synthetic or feather duster and can be wiped lightly with a damp cloth.

Maintenance

All our products are manufactured using aluminium and glass reinforced nylon and engineered polymers. They do not present any corrosion problems in normal working environments.

If there is a failure of a component, depending on which, it can be replaced without the need for a new complete blind.

Replaceable components:

Installation brackets
Control Wand
Bottom rail plugs
Bottom rail end caps
Valance (including valance clips)

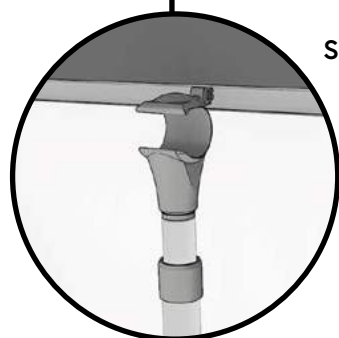

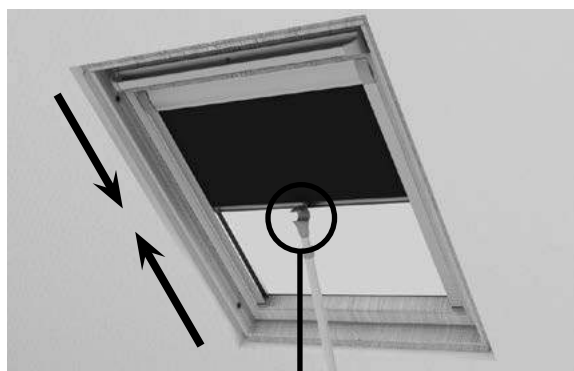

Bloc Hook Pole - 2m & 3m

Open and close skylight roller blind

PAY ATTENTION – Only operate the roller blind with the roof window closed.

Use the hook pole only as demonstrated to prevent damage to the product.

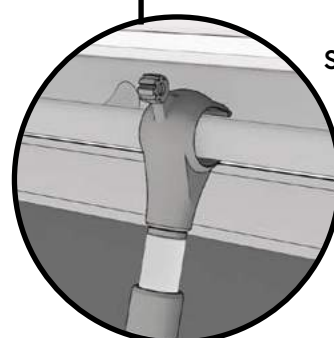

Tilt handle inwards to operate blind.

Side A

Open and close skylight window

Place side B on the operating handle of the window and move the hook pole down to open the window and up to close the window.

Side B

Clearline
